

EVA-LAST®

INSPIRED BY NATURE, DESIGNED FOR LIFE.

CREATIVE USES FOR BAMBOO COMPOSITE

Let your imagination run wild with the durability and versatility of bamboo composite building materials.

Eva-Last® Bamboo Composite Materials

Eva-Last® offers three unique bamboo composite technologies, each with their own distinct characteristics, benefits, look, and feel. Consult an Eva-Last® representative to see which range is best for your outdoor project.

Apex®

**LIGHTWEIGHT, CAPPED BAMBOO-PVC
COMPOSITE DECKING**

Apex® boasts an ultra-lightweight bamboo-PVC core and an exceptionally natural looking dual-tone finish.

***Infinity*®**

CAPPED BAMBOO COMPOSITE DECKING

Infinity® leads the market in durability with resilient polymer capping, and a bamboo-plastic composite core.

***Eva-tech*®**

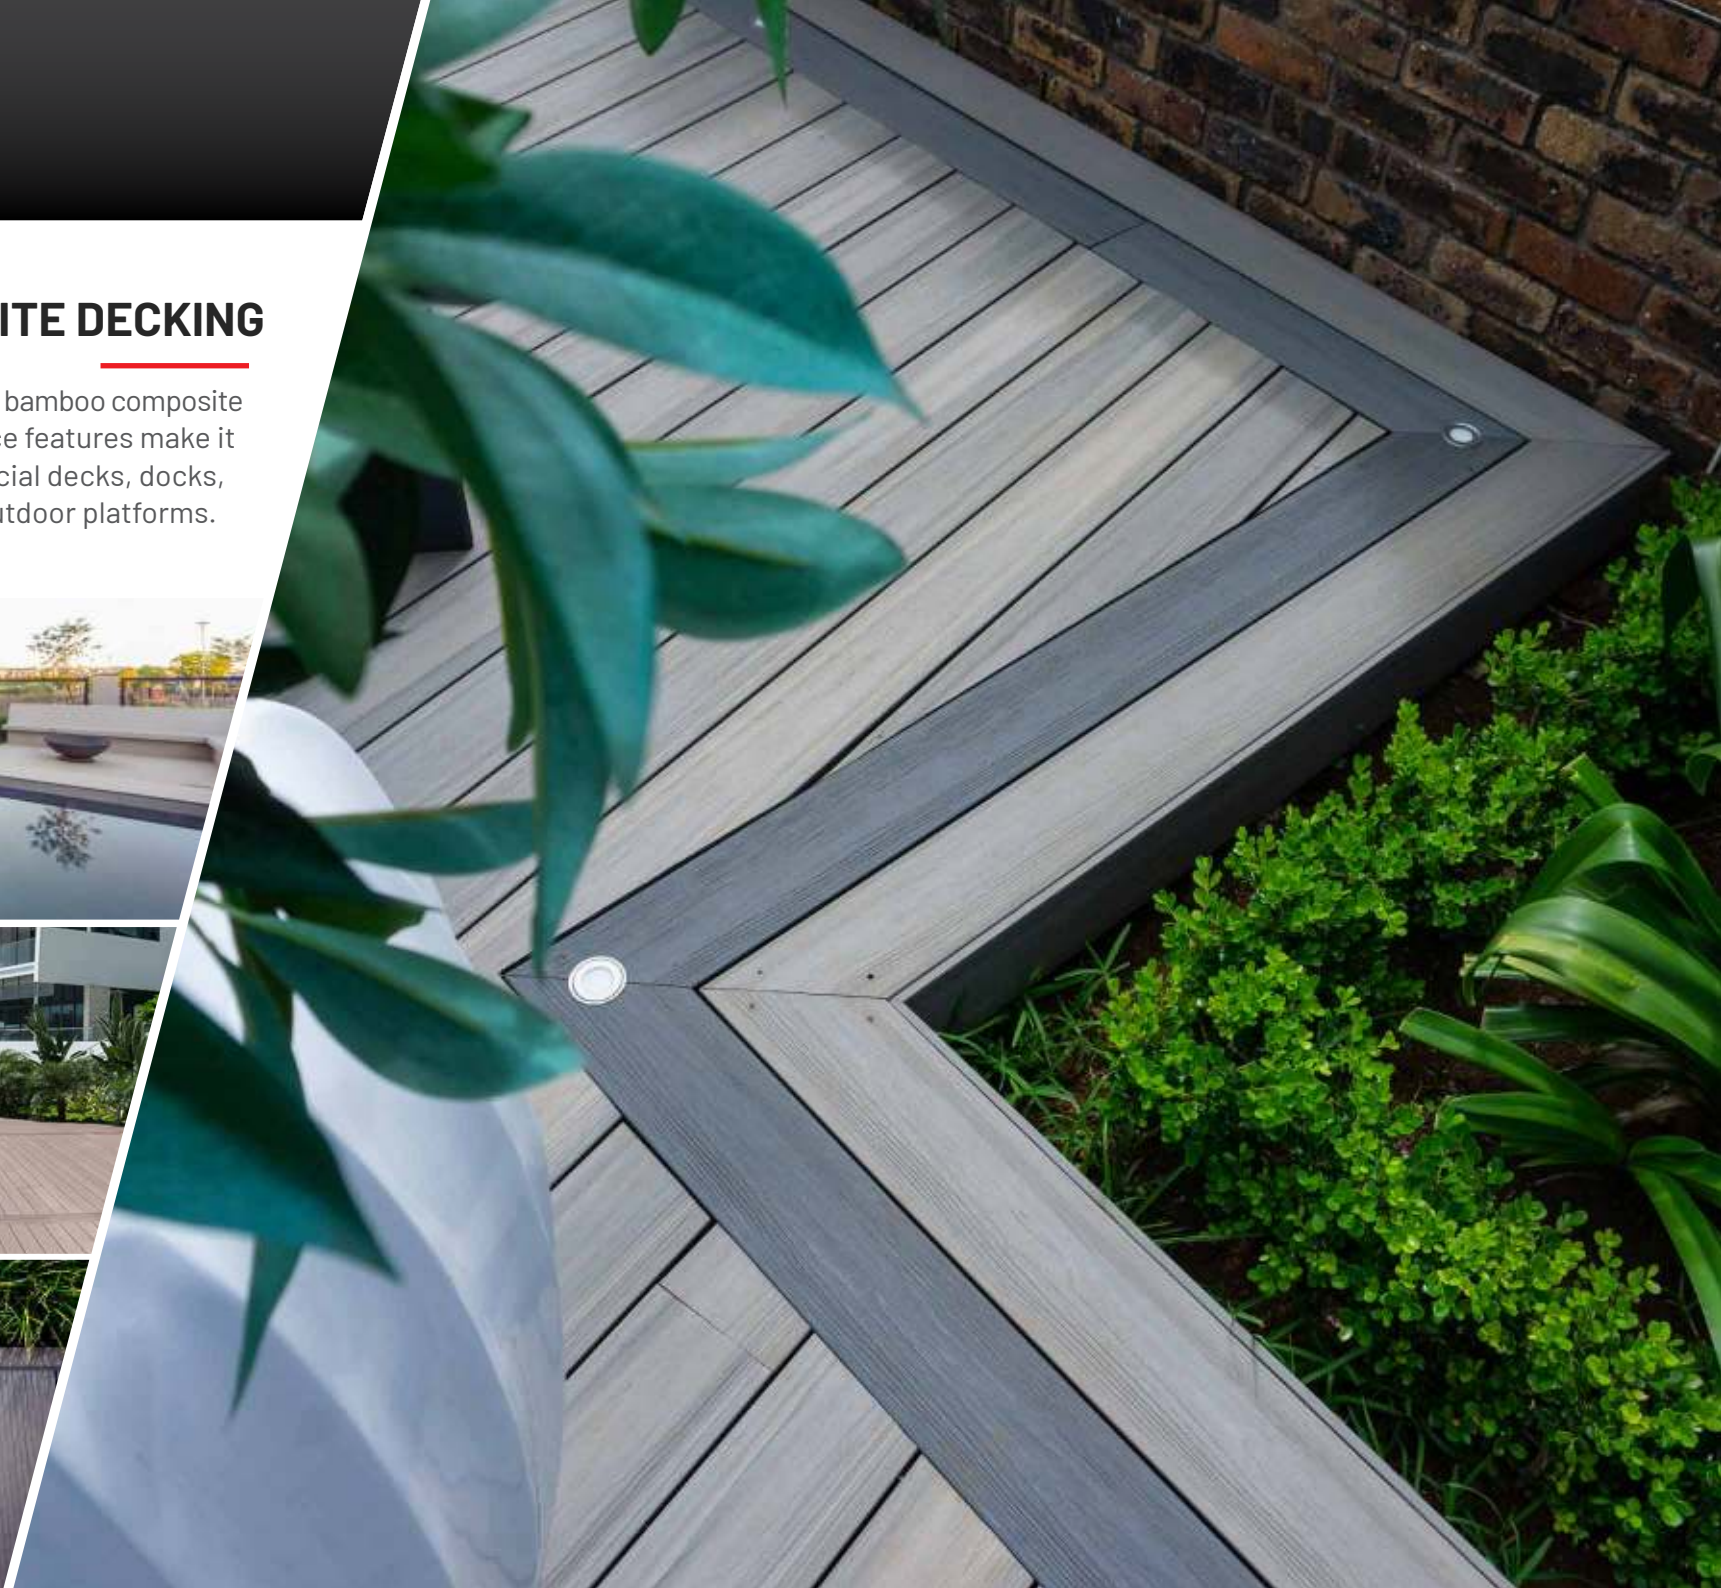

BAMBOO COMPOSITE DECKING

Eva-tech®, the time-tested, original Eva-Last® range, is the most cost-effective bamboo composite available.

DECKING

COMPOSITE DECKING

The most common application for bamboo composite is decking. Its low-maintenance features make it ideal for residential and commercial decks, docks, and other outdoor platforms.

CLADDING

COMPOSITE CLADDING

Composite cladding is taking the market by storm as more and more home and business owners opt for low-maintenance, long-lasting bamboo composite cladding that gives the look of wood without the hassles.

SCREENING

TRADITIONAL COMPOSITE SCREENING

Composite screening offers the durability and weather resistance necessary for long-lasting decorative screening and privacy screening.

SCREENING

CREATIVE COMPOSITE SCREENING

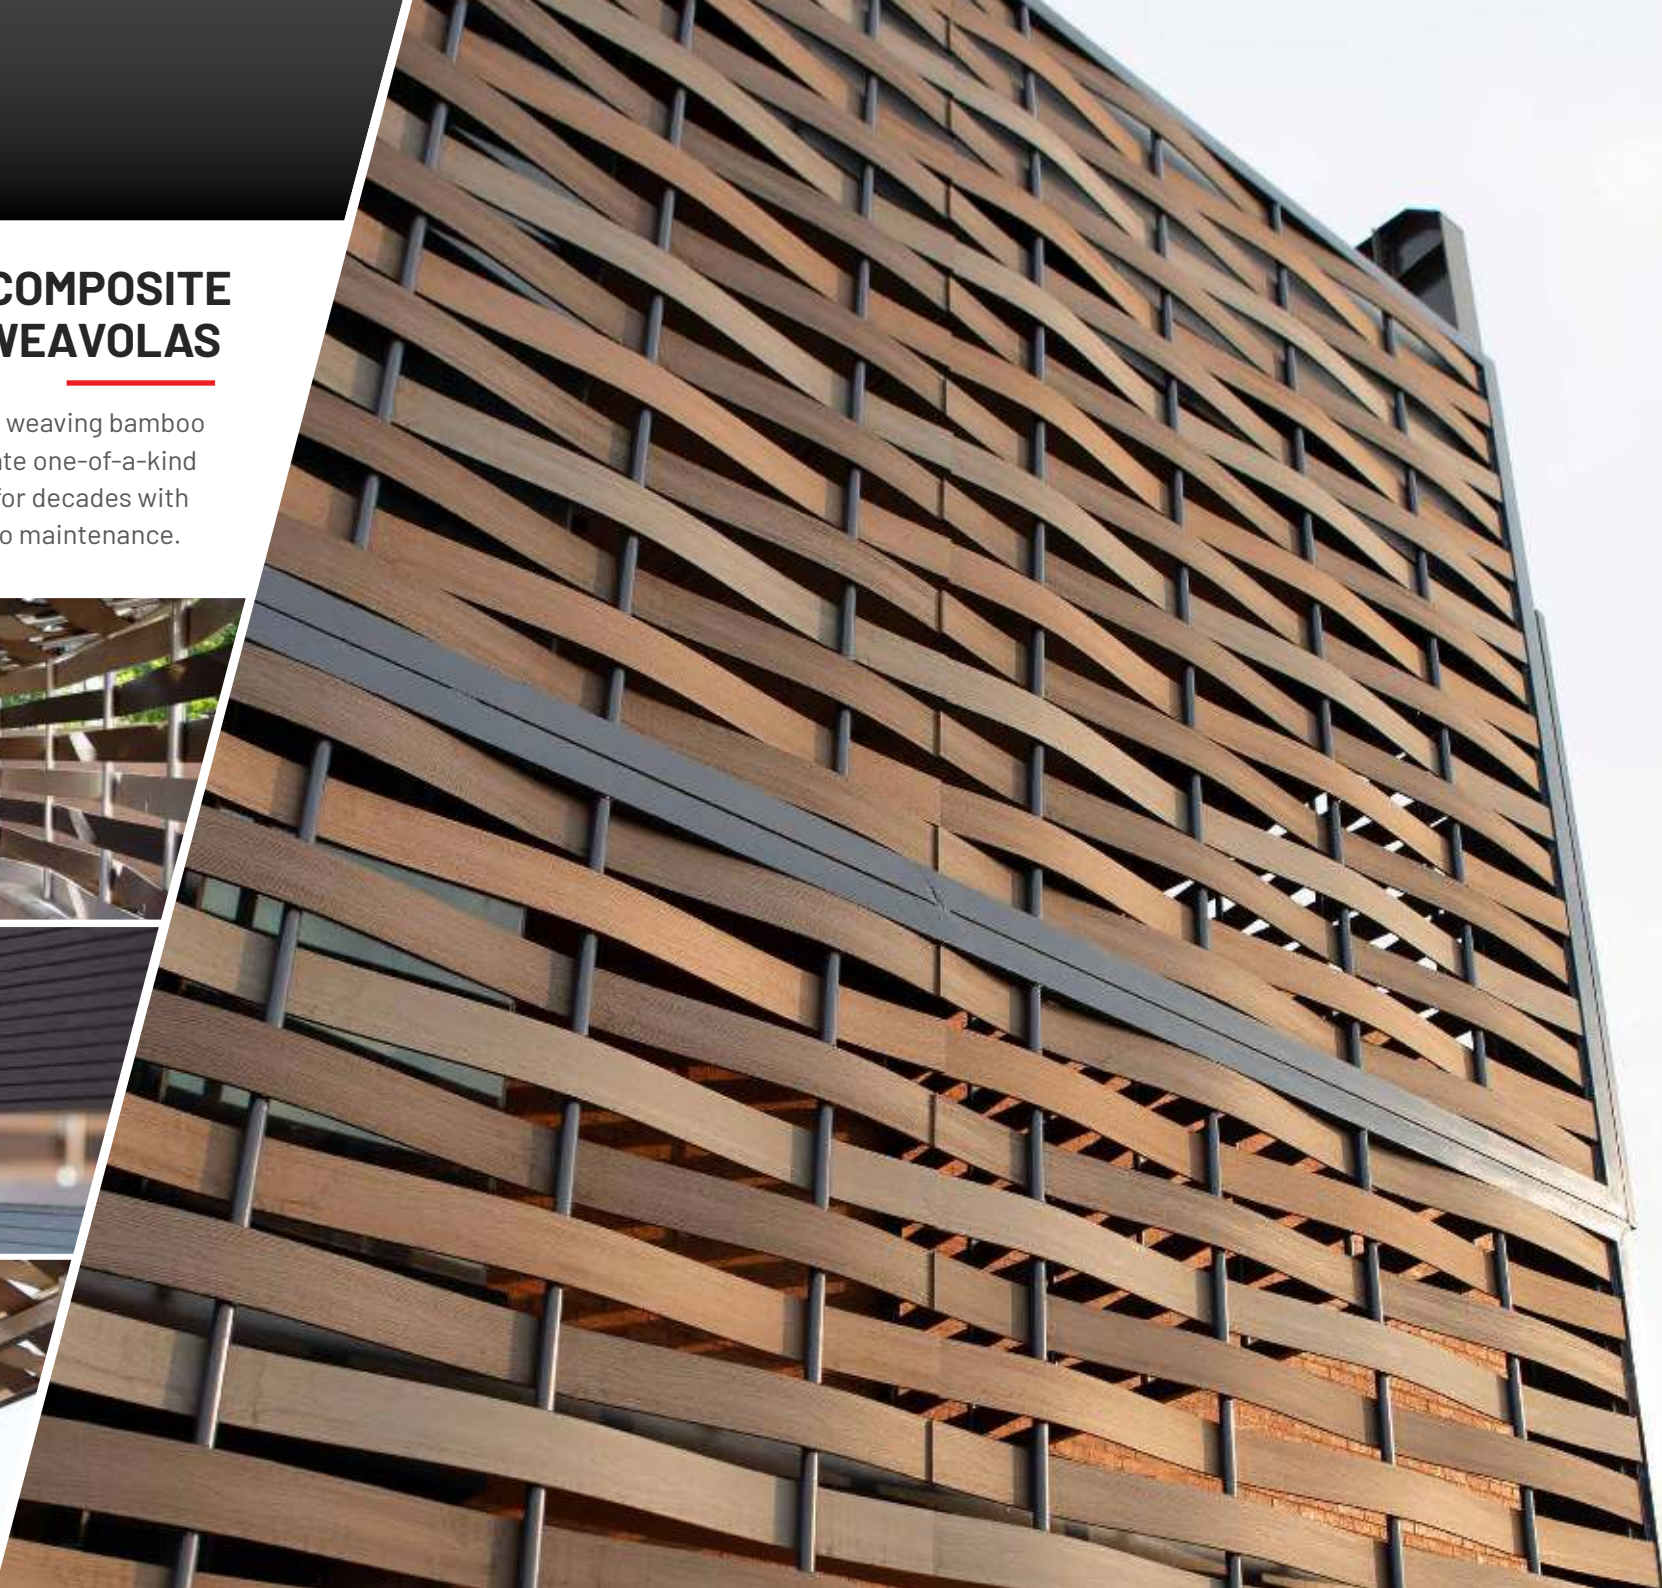

Composite is now available in a range of nuanced colours, textures, and styles that are ideal for creating modern and unique screens, trim, and other creative outdoor accents.

WEAVOLAS

DECORATIVE COMPOSITE WEAVOLAS

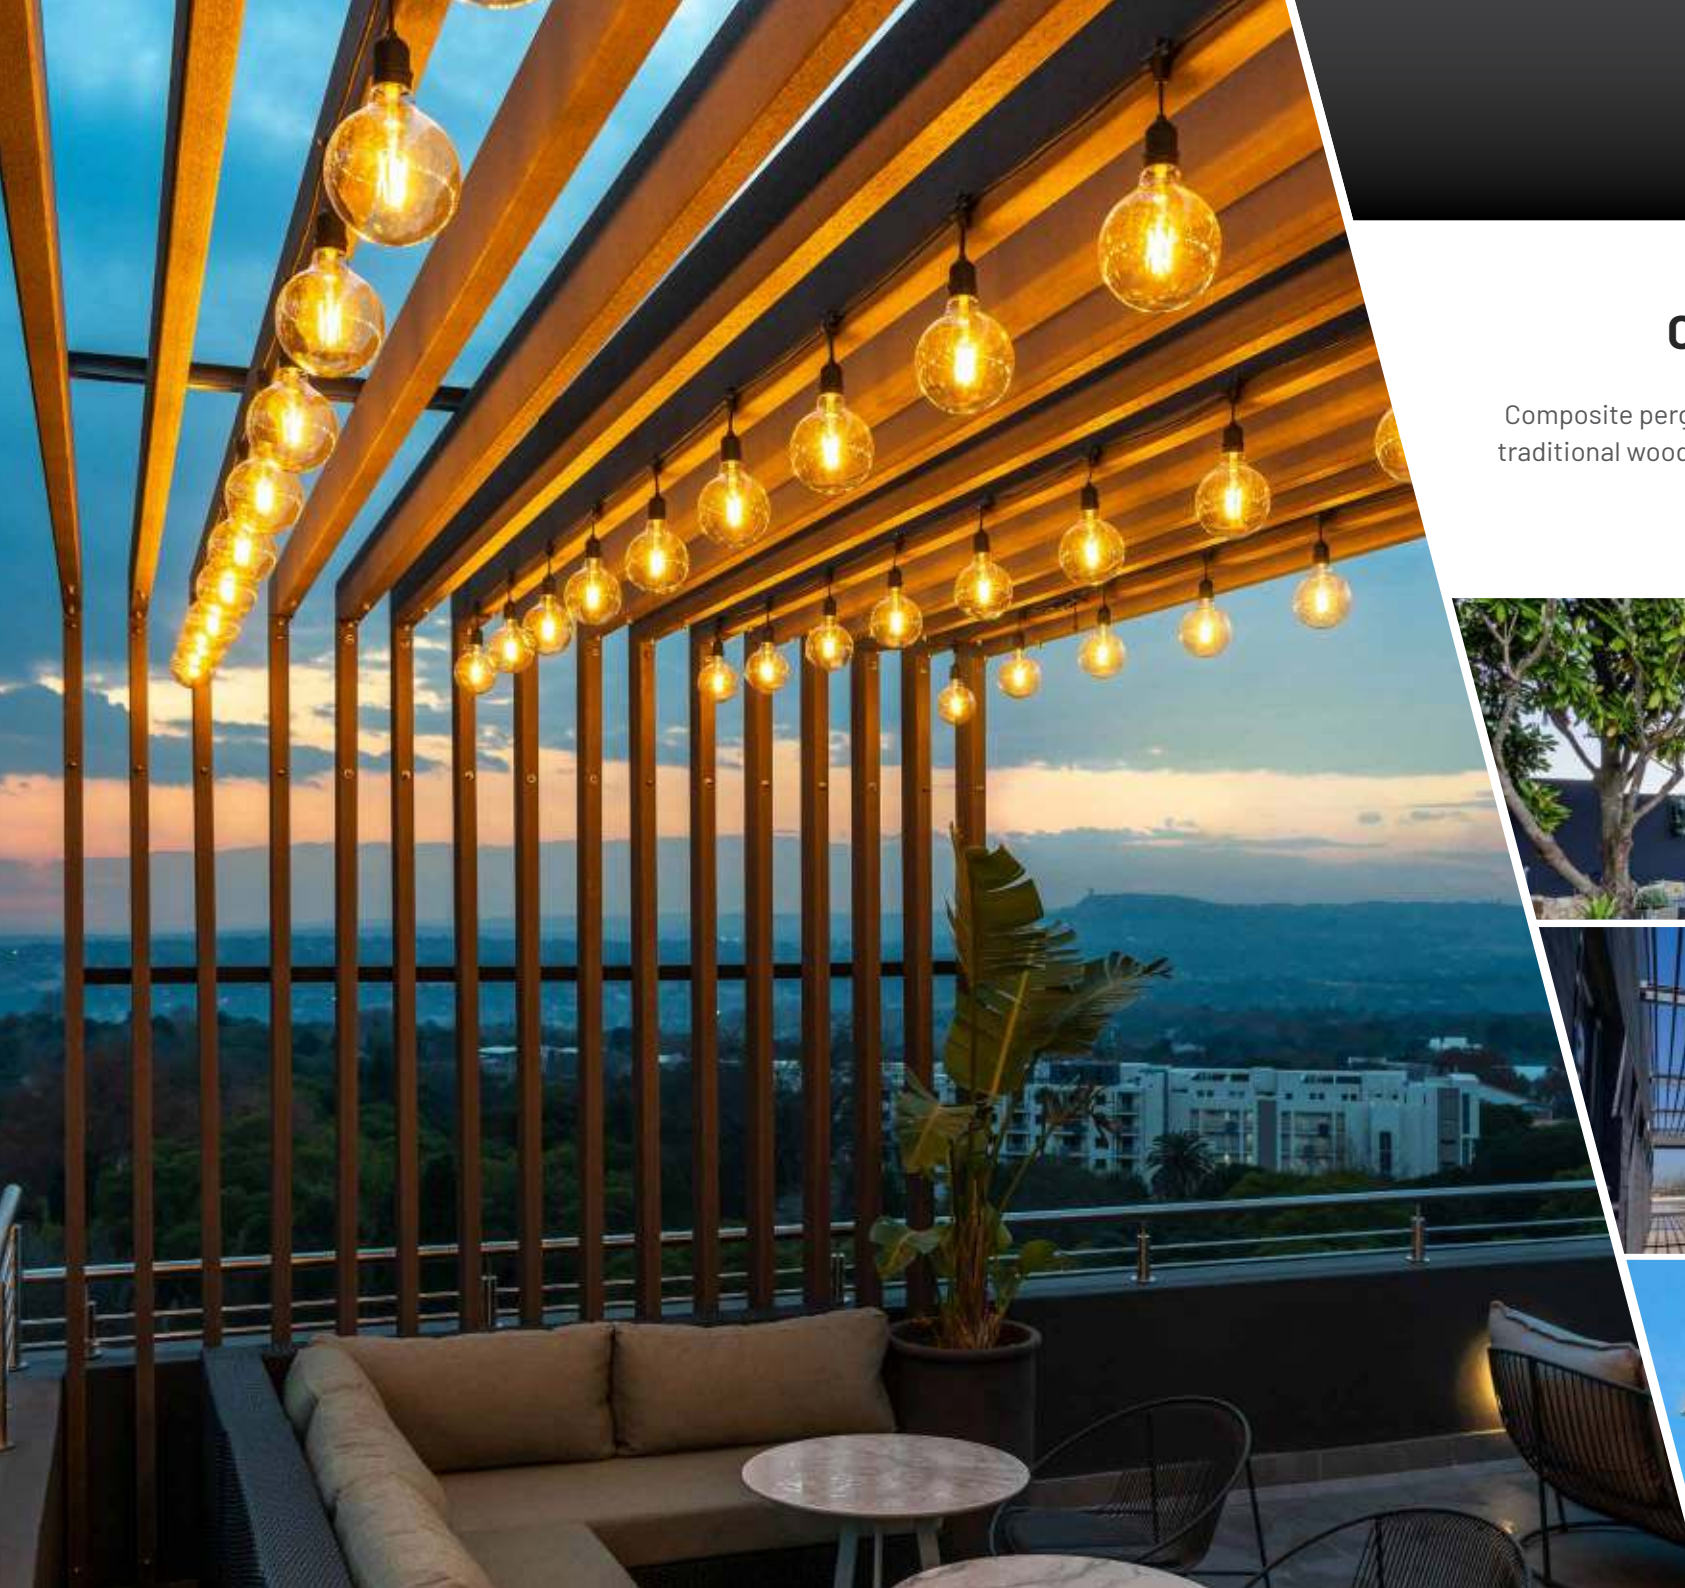

Beautiful weavolas are created by weaving bamboo composite fascia boards to create one-of-a-kind screens and shade roofs that last for decades with virtually no maintenance.

PERGOLAS

COMPOSITE PERGOLAS

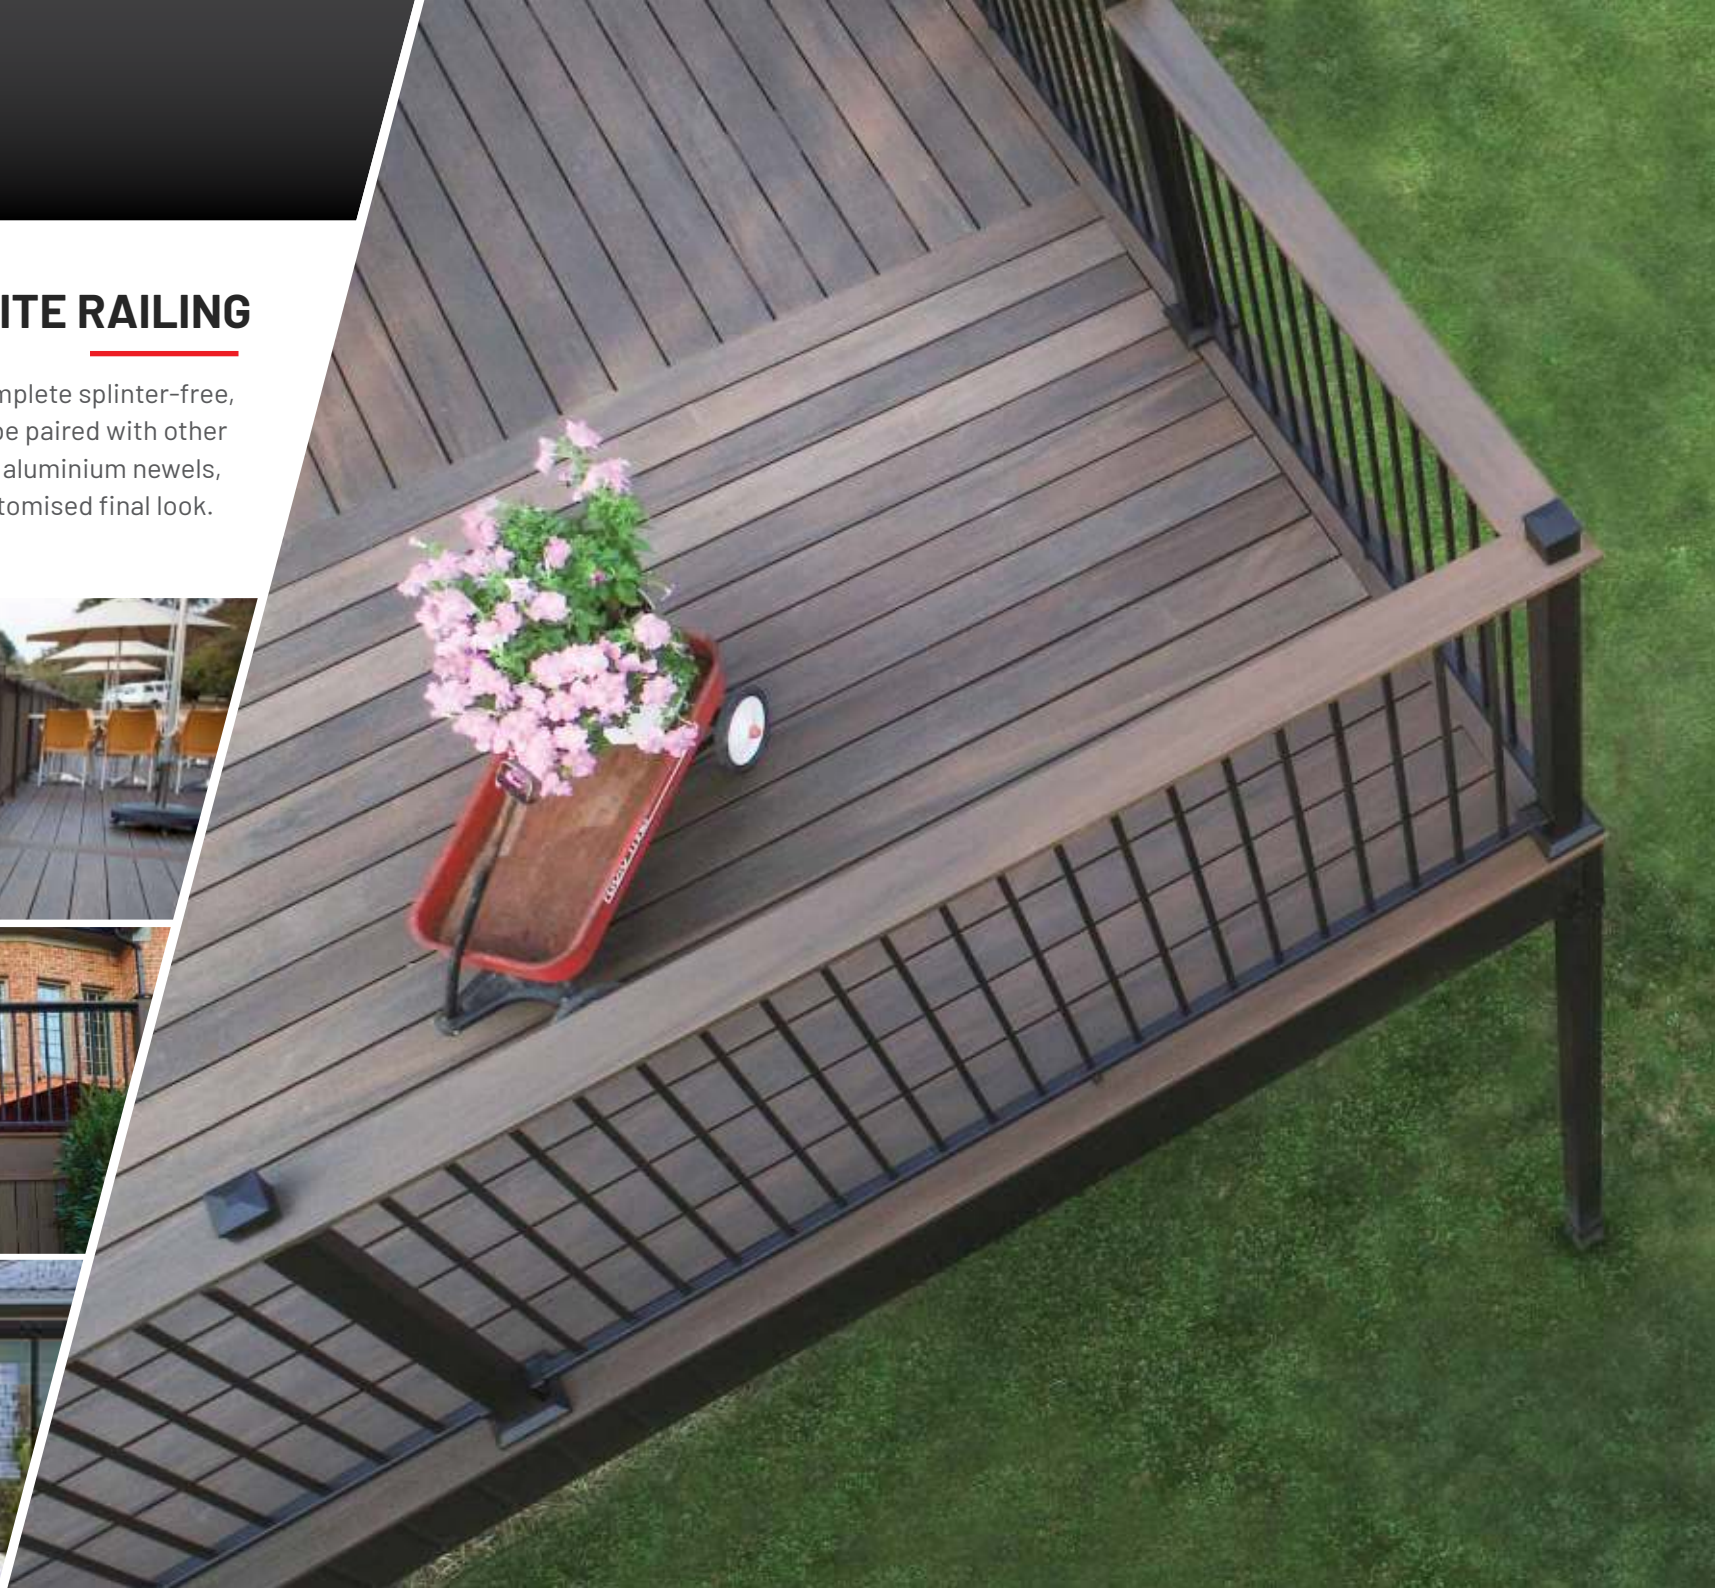

Composite pergolas provide the elegance and shade of traditional wood pergolas in a lower maintenance, more weather resistant material option.

RAILING

COMPOSITE RAILING

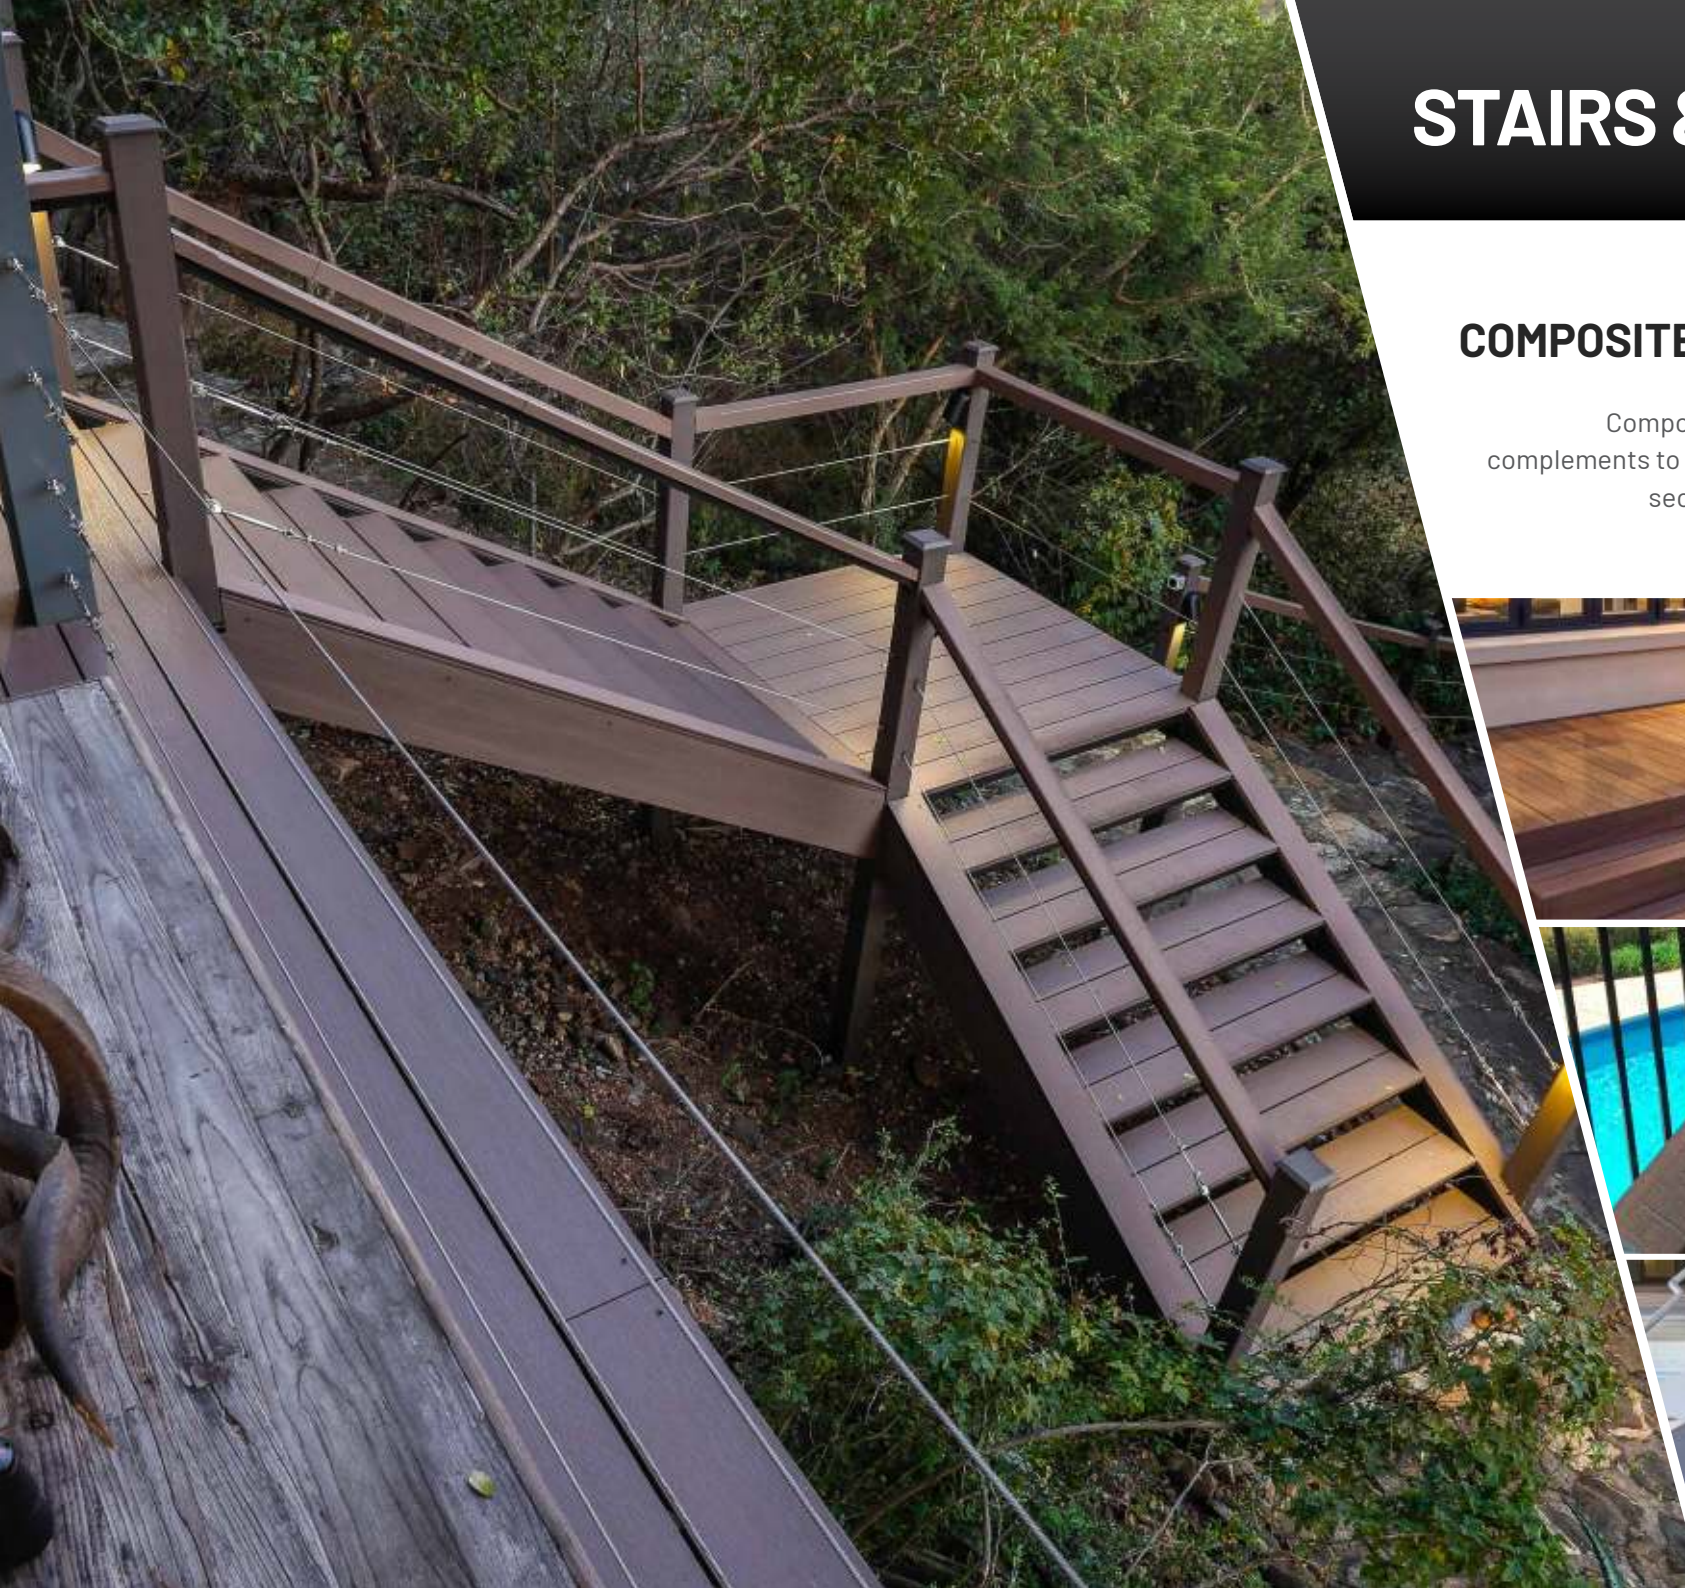

Composite can create a complete splinter-free, weather resistant railing system or be paired with other low-maintenance railing options, like aluminium newels, steel cable, or glass panels for a customised final look.

STAIRS & HANDRAILS

COMPOSITE STAIRS & HANDRAILS

Composite stairs and handrails are the perfect complements to a composite deck by offering structural security and a lower maintenance lifestyle.

FENCING

COMPOSITE FENCING

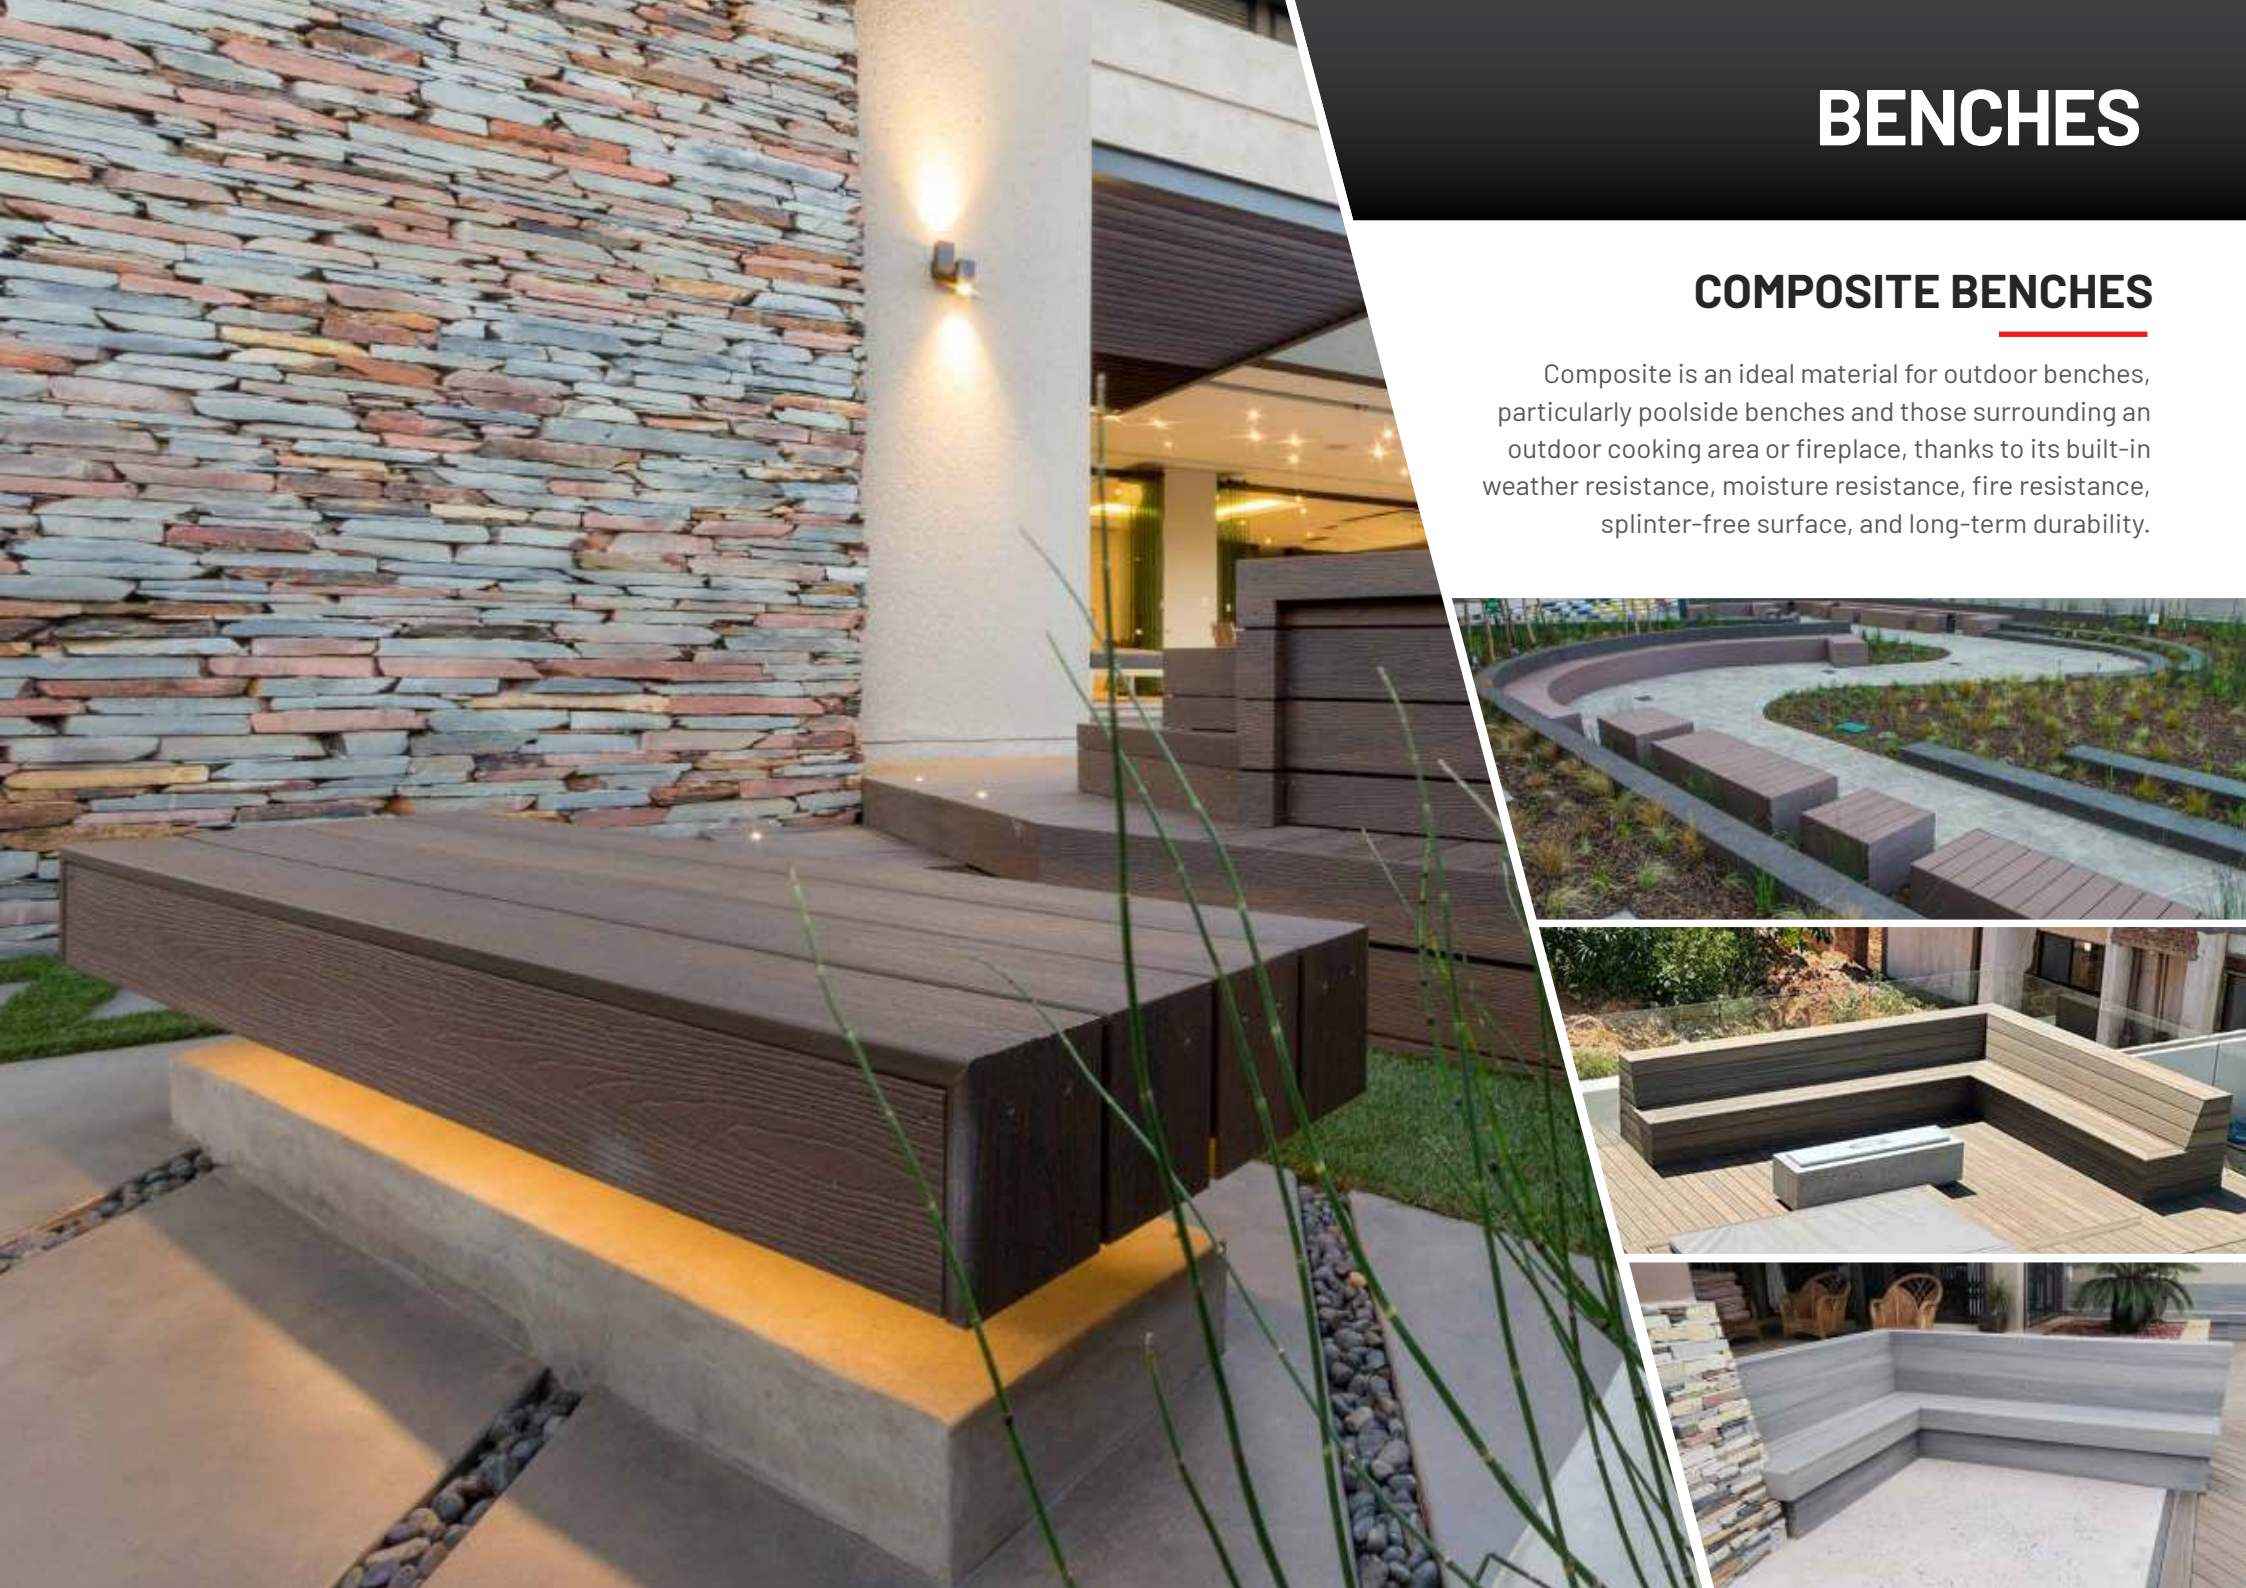

Composite is a long-lasting and resilient material that embodies the look of wood and makes for attractive, hardy, and low-maintenance fencing.

BENCHES

COMPOSITE BENCHES

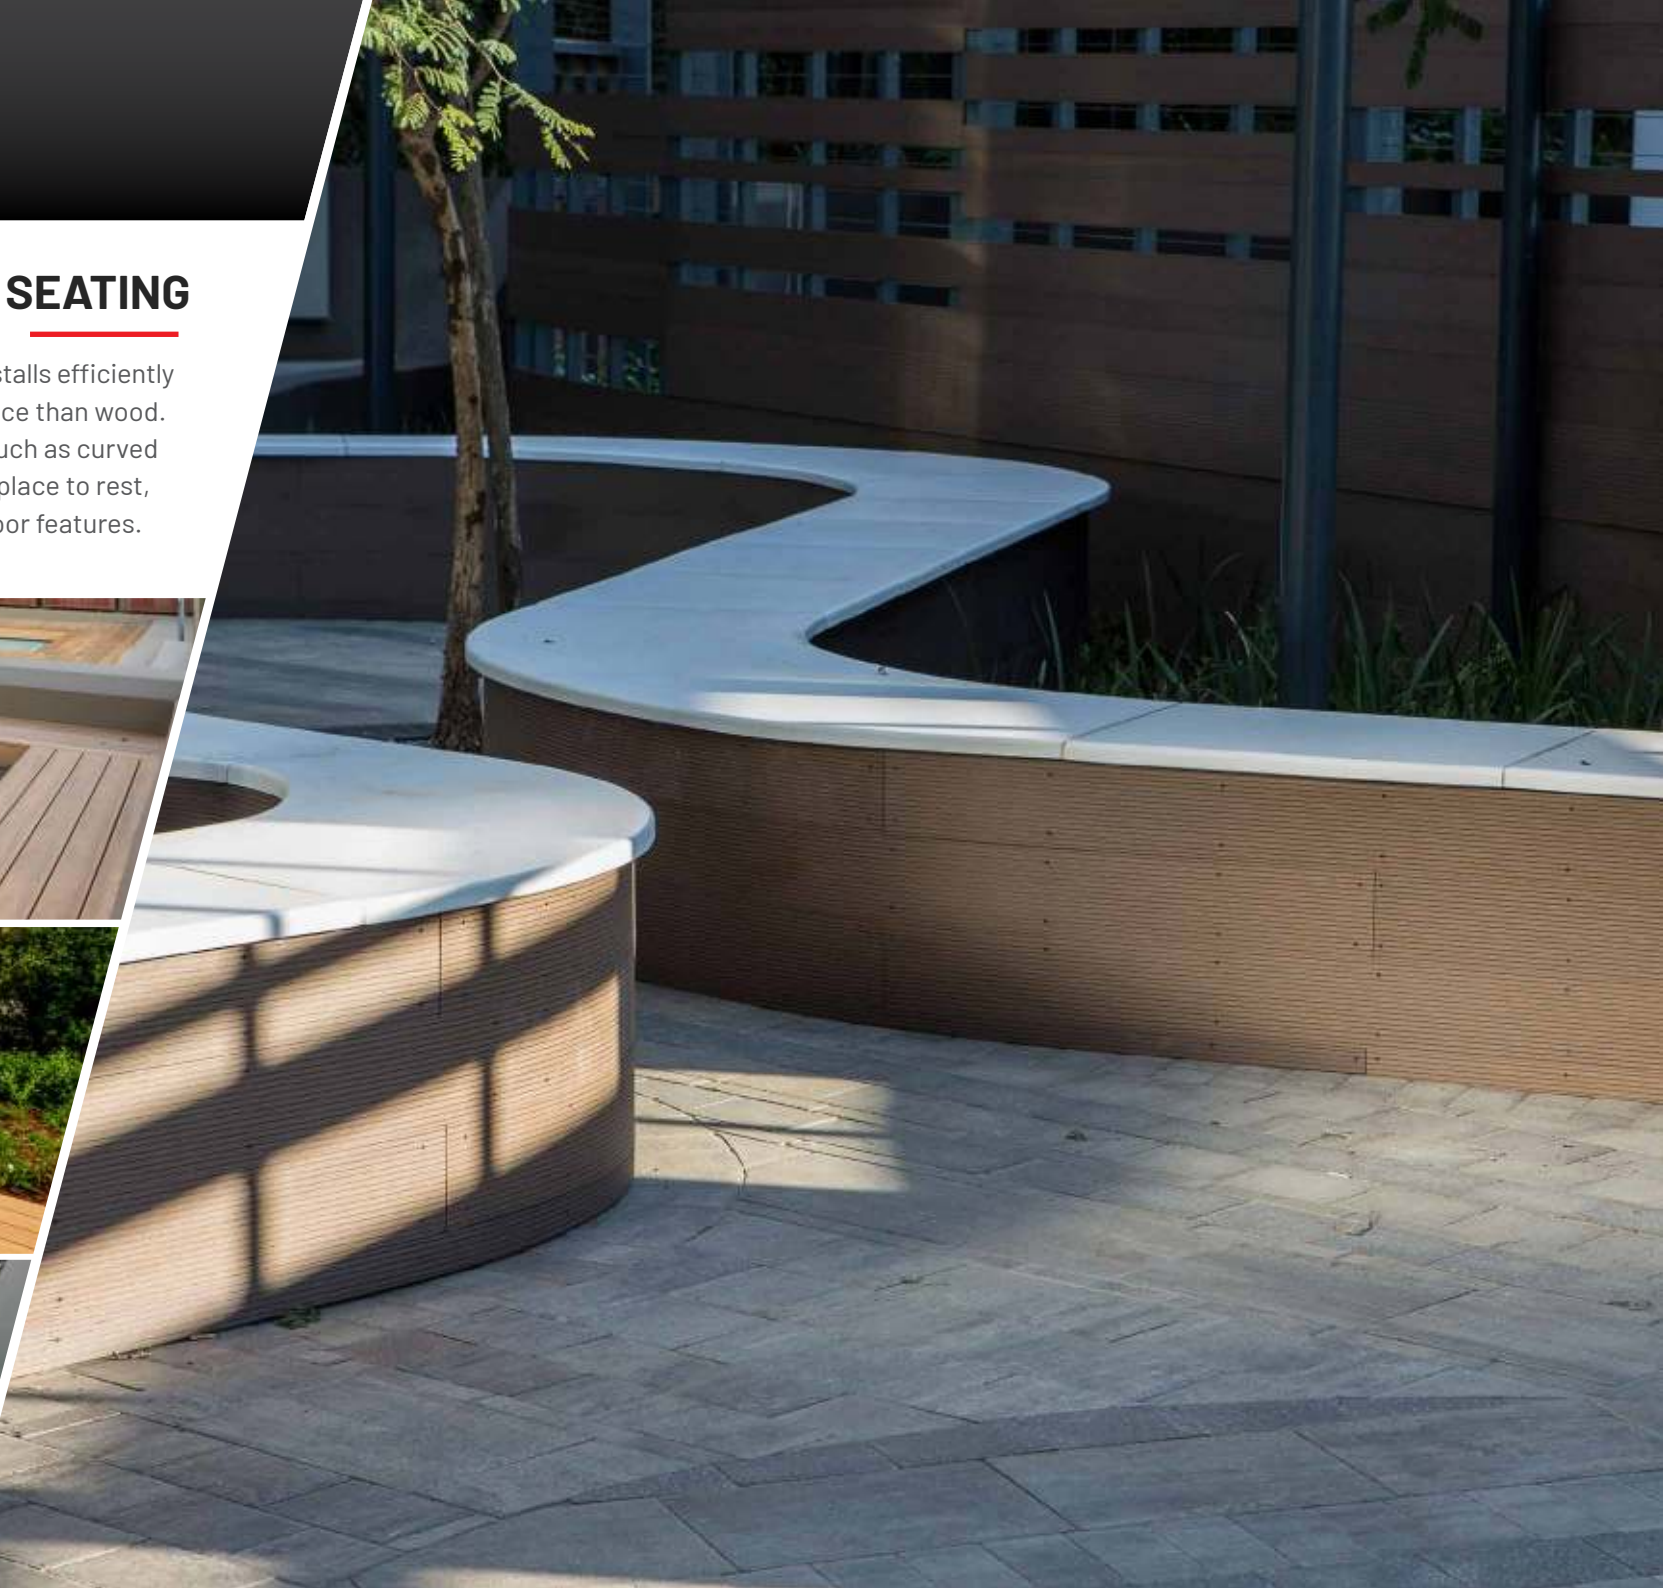

Composite is an ideal material for outdoor benches, particularly poolside benches and those surrounding an outdoor cooking area or fireplace, thanks to its built-in weather resistance, moisture resistance, fire resistance, splinter-free surface, and long-term durability.

SEATING

OTHER COMPOSITE SEATING

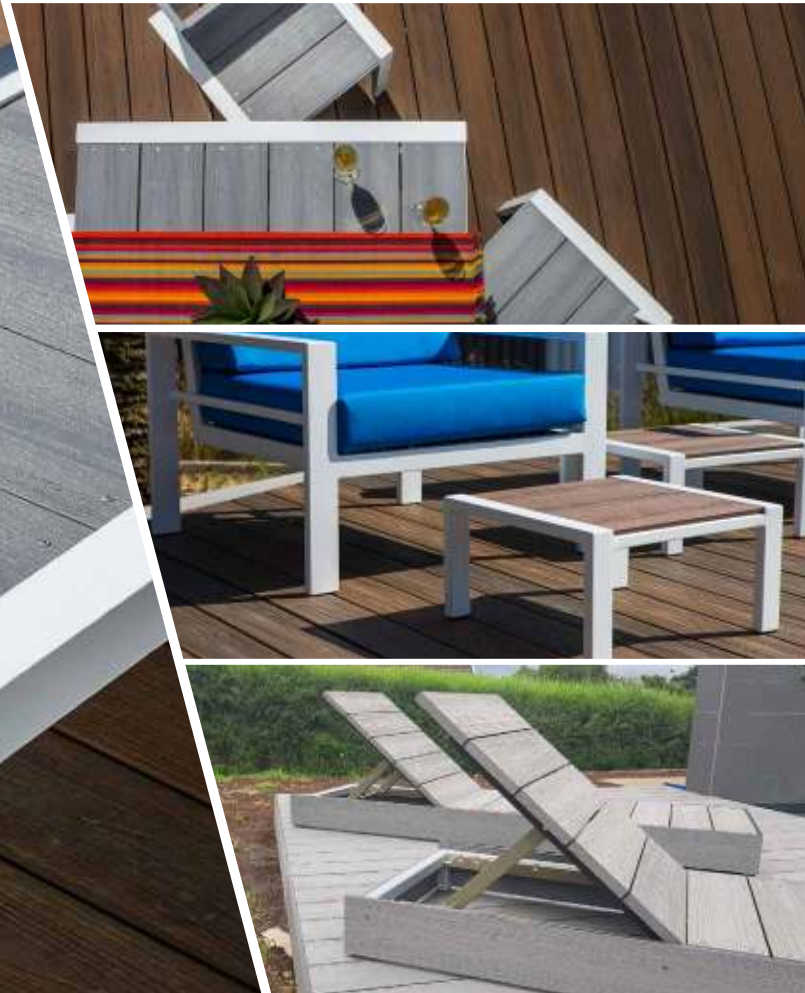

Composite is a versatile material that installs efficiently and lasts longer with less maintenance than wood. Creative composite seating solutions, such as curved benches and low walls that double as a place to rest, are unique and functional outdoor features.

FURNITURE

COMPOSITE FURNITURE

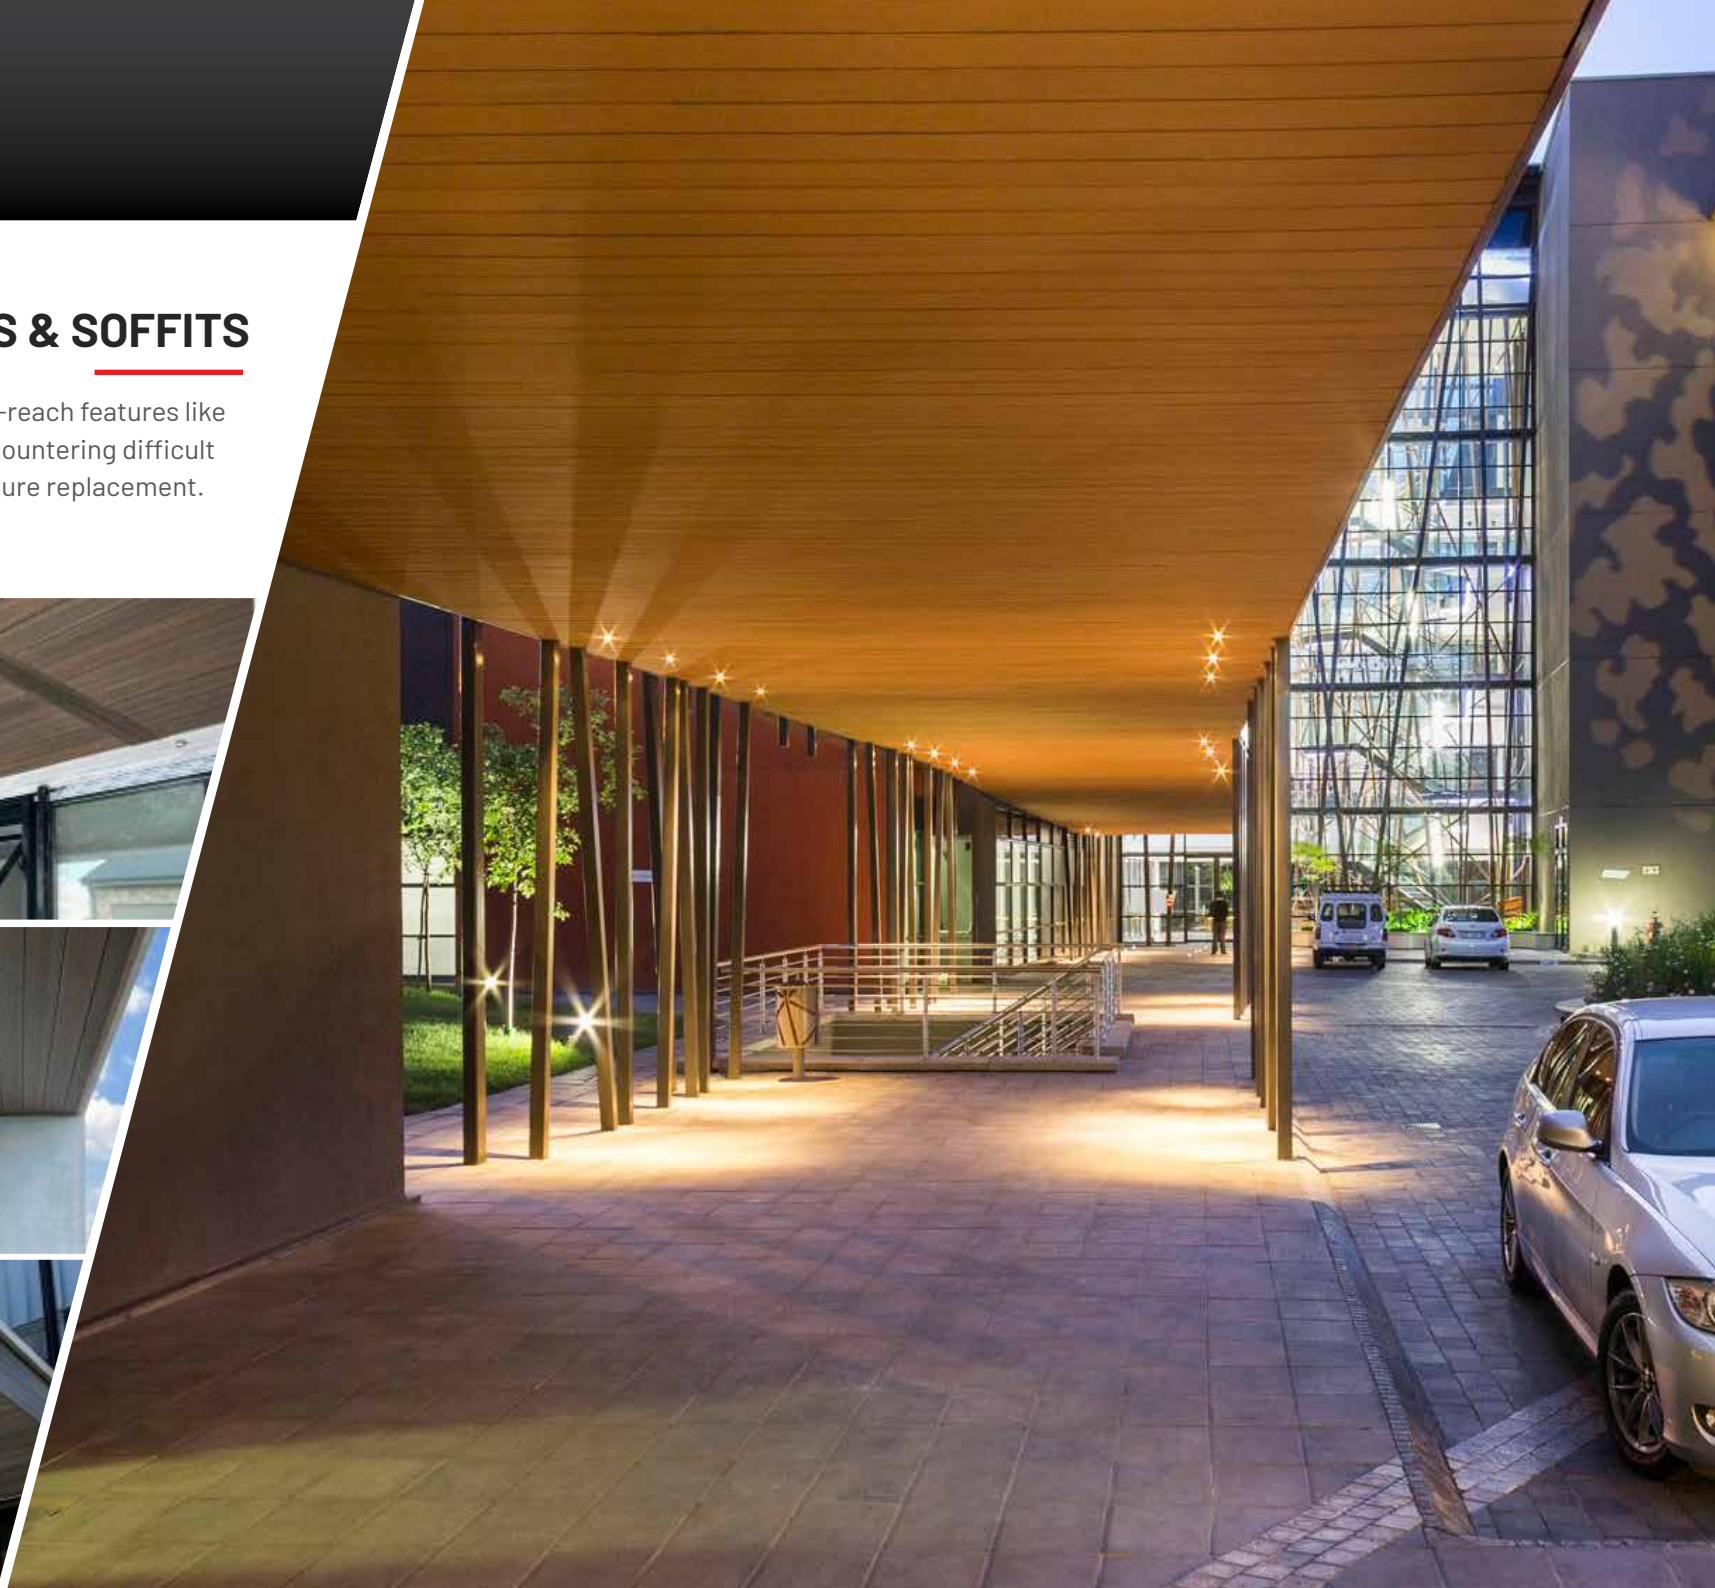

Composite furniture makes your outdoors all the easier to maintain and appreciate. It weathers the elements with grace and can be enjoyed rather than stored away during the winter months.

CEILINGINGS

COMPOSITE CEILINGINGS & SOFFITS

Opting to use composite for hard-to-reach features like ceilings and soffits saves you from encountering difficult maintenance and premature replacement.

CURVED CEILINGS

CURVED COMPOSITE CEILINGS

The long-lasting durability, flexibility, and low-maintenance features of composite make it perfect for creating show-stopping features like a curved ceiling.

ARCHITECTURAL

COMPOSITE ARCHITECTURAL ACCENTS

Engineering advancements in the aesthetics as well as the environmental, lifestyle, and structural benefits of composite make composite the optimal material for creative modern architectural accents.

GATES

COMPOSITE GATES/GARAGE DOORS

Long-lasting composite gates, doors, and garage doors can be designed to add a sleek modern touch or traditional natural look to your home or commercial space.

POOL COVERS

COMPOSITE POOL COVERS

Create attractive and weather resistant pool and hot tub covers with bamboo composite; a highly moisture resistant, splinter-free, and low-maintenance material option.

SIGNAGE

SIGNAGE IN COMPOSITE

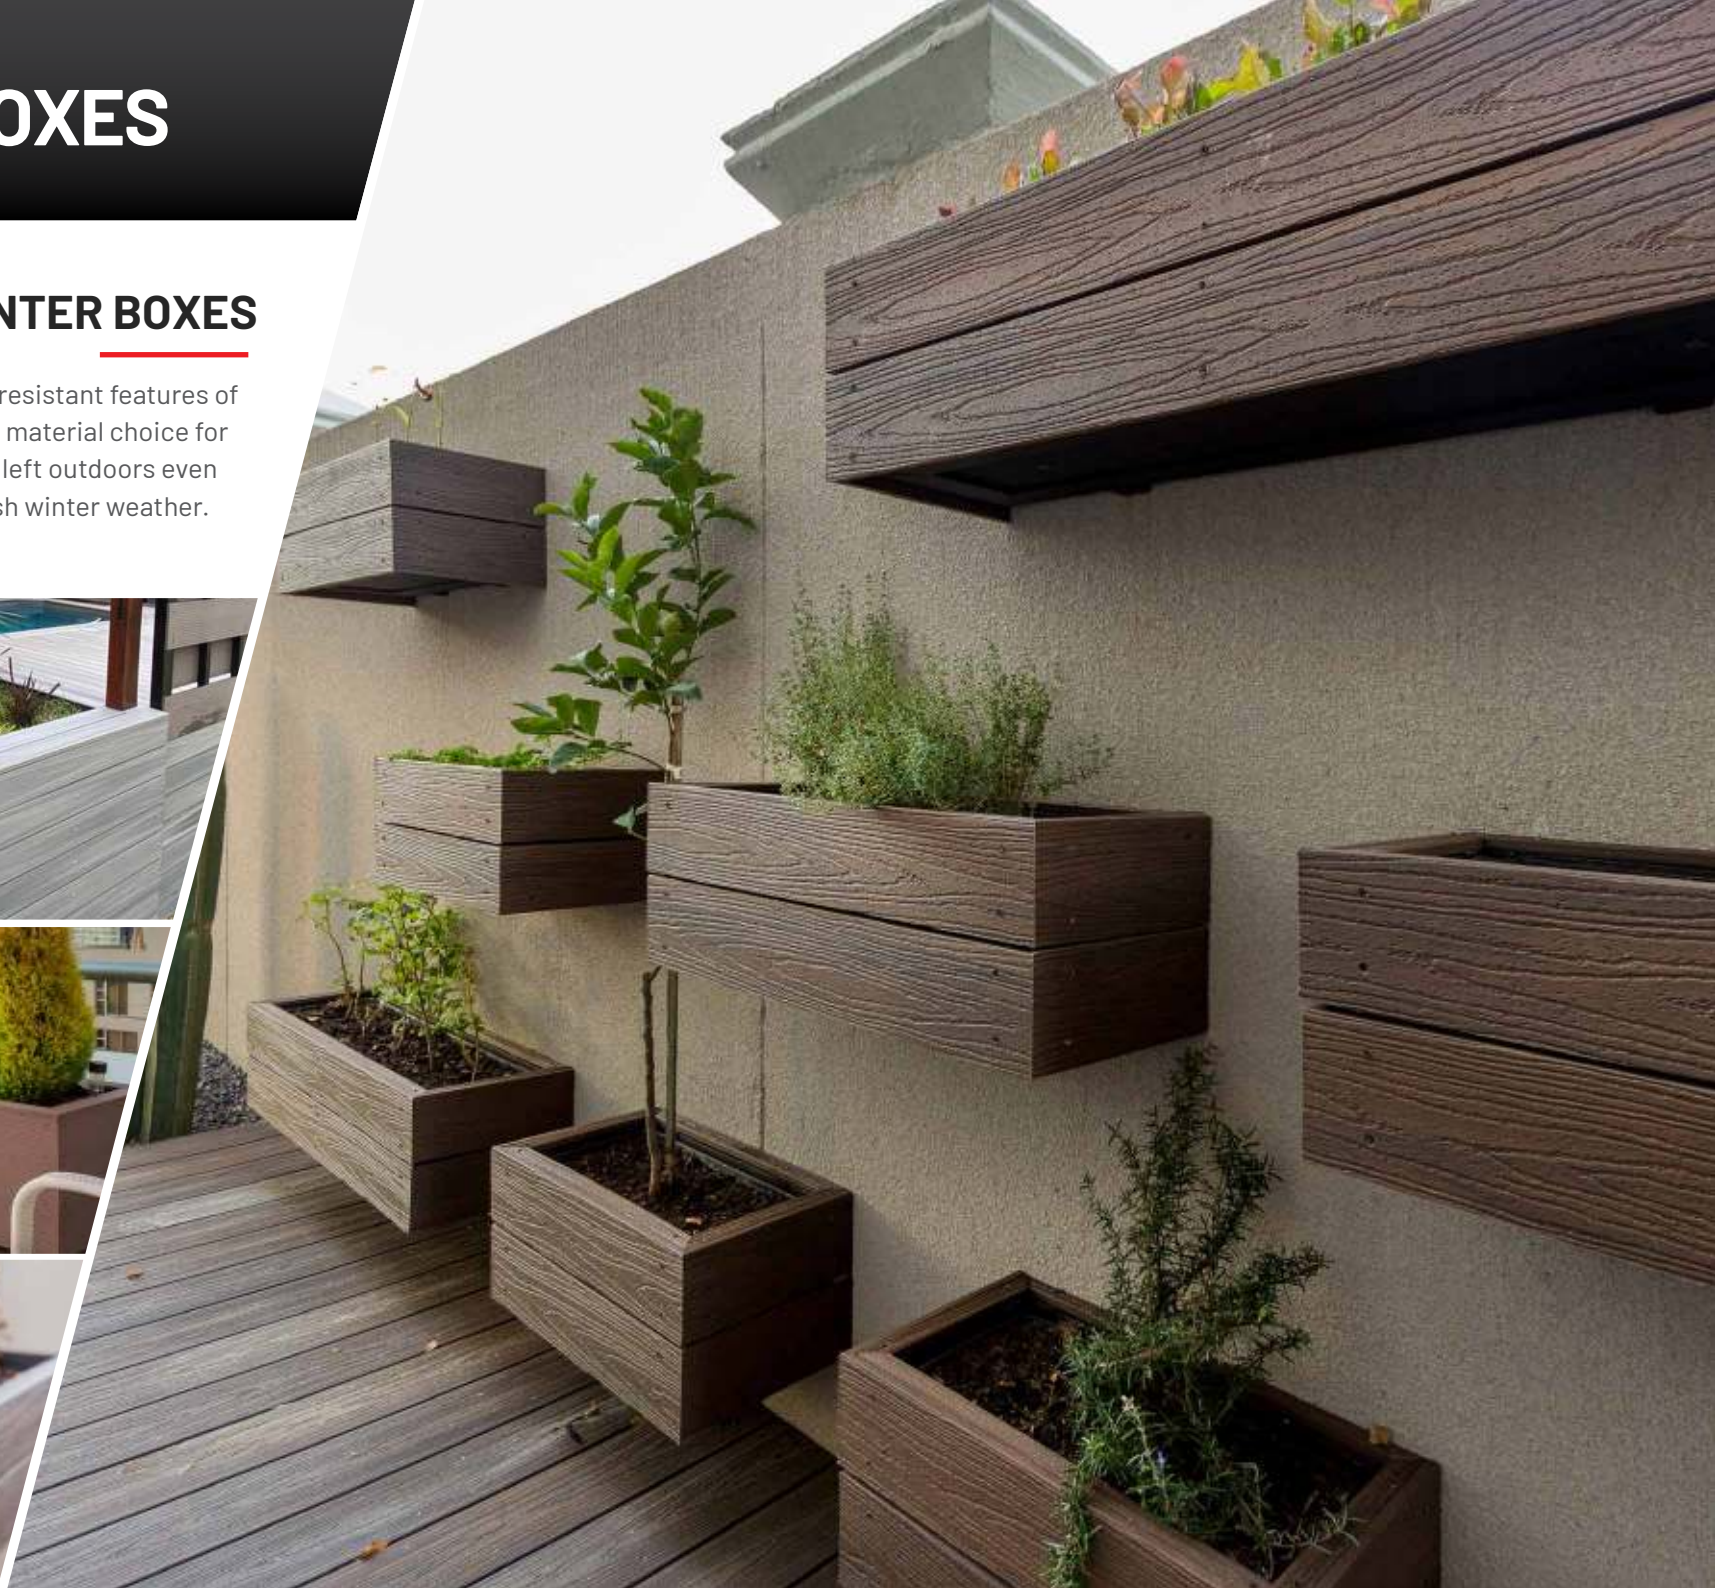

Composite signs are longer lasting and lower maintenance than traditional wood signage. Enjoy all the beauty of wood signage in a material option that's gentler on the environment and more worry-free.

PLANTER BOXES

DECORATIVE PLANTER BOXES

The moisture resistant and weather resistant features of bamboo composite make it the ultimate material choice for decorative planter boxes which can be left outdoors even in harsh winter weather.

BUSH RETREATS

COMPOSITE IN THE BUSH

Long-lasting composite is the perfect material for use in the bush. Small creative bush cabins to luxury safari resort accomodations, Eva-Last has done it all.
